TO: Sacramento Local Agency Formation Commission
FROM: Peter Brundage, Executive Officer
RE: Presentation: Overview of the Regional Water Authority

John Woodling of the Regional Water Authority (RWA) will present an overview of regional water issues including the current drought conditions and issues related to Sacramento-San Joaquin delta. Water providers in the Sacramento region are committed to finding sustainable solutions for the Delta and the state's water challenges. However, solutions currently under consideration would have significant impacts that undermine the region's water supplies, natural resources, economy and quality of life.

The Regional Water Authority is a joint powers authority formed in 2001 to promote collaboration on water management and water supply reliability programs for water agencies in Sacramento, Placer, and El Dorado counties.

RWA has obtained more than \$68 million of state and federal grant funds to conduct planning and implement water supply, water quality, and environmental restoration projects for its member agencies.
